ant to day, its upward impulse being immediately and mainly due to the course of Erie, which has experienced a further sharp advance under the efforts of a combination. Opinions are, as usual, divided as to whether the present rise is the commencement of a permanent improvement or marely a spasmodic movement. Much depends upon the action of the operators in Eric us to the future of the rest of the speculative list. If it is well sustained a moral support will be given to the rest of the market, and other operators will take hold of other market, and other operators will take hold of other stocks, one by one, and another period of active speculaon in railway shares may be the result; but should Eric break the whole market will sympathize with it, and digation will be the result.

The supply of money was more abundant than last week to the Stock Exchange, and loans were made in many cases at six per cent, although the rate usually asked by the banks was seven. In one or two excep-tional cases large amounts were leaned to first class parties on government securities at five. In the discount I'ne there is increasing activity, and the best grade of paper submits to seven per cent. The amount of commercial paper offering is probably ten times a: large as it was a year ago. The statement of the associated banks for the week ending on the 9th inst. had a favorbanks for the week ending on the 9th inst. had a favorable effect in strengthening confidence in a continuance
of monetary case. The legal tender notes show an increase of \$1,509,245 and the deposits of \$2,204,613. The
loans have increased \$1,975,027, owing chiefly to the
enlarged volume of business on the Stock Exchange.
The specie has decreased \$711,199, owing to withdrawals
for customs duties, and the circulation has increased
\$116,378. The totals of the present and previous statements stand thus.—

The money market is wo	rking easier in	Boston than

when we last referred to it, confidence, which was shaken by the recent bank and stock jobbing irreguin that city, having been restored. At Chicago of the discount houses report a fairly active de d for money called out by the speculative move-ts in produce and provisions, but elsewhere the unt of paper offering is very light and the demand accommodation is (mainly confined to renewals, banks favor only the best names, and these pass at per cent. In the open market money is more abundant and loans are negotiated on approved paper at 1% a 1% per cent per month. The Hudson River Railway Company has just issued a sircular to its stockholders calling a meeting on the 30th

circular to its stockholders calling a meeting on the 30th of the present month for the purpose of obtaining their matchen to the increase of the capital stock of the company to the amount of \$13,937,400, the assigned reason for this increase being the extension of the depot ac-commodations for freight and passengers and double tracking the entire road, retiring a portion of its bonded lebt and adding to its rolling stock, as may be required The amount of the stock at present outstanding is \$4,961,971, so that this is a proposal to double it. Such wholesale "watering" of any stock is, however, inde-ferable. fensible on the score of good policy, and it almost invariably results ultimately in injury to the stockholders, even where no stock jobbing motive underlies the operation. This new proposition of carried into execution, will endanger the prospects of the Hudson River Railway as good divisiond raying the Hudron River Railway as a good dividend-paying property, although it may serve the private purposes of those into whose hands the new stock will fail. Doub-ling the stock of a road means reducing the dividends lieg the stock of a road means reducing the dividends one-half, unless its net earnings are largely increased in consequence of the improvements for which the additional stock is issued, and, although the Hudson River line is doing a profitable business at present, it is by no means certain that the proposed improvements would make it a more valuable property than it is in proportion to the money expended upon it as represented by its capital stock. The circular referred to reads as follows:

NEW YORK, March 5, 1867.

To THE STOCKHOLDERS:—

GENTLEMEN—At a meeting of the Board of Directors of this company, held at the office of the company in New York, on the 5th day of March, 1887, it was resolved that it be recommended to the stockholders thereof to increase she capital stock of the company to the amount of \$13,937,600, for the perpose of increasing its depot accommodations for freight and passengers and double tracking the entire read, retiring a portion of its bonded slebt and adding such increase to its rolling stock as shall be required. The additional capital to be issued at such times and apon such conditions as the Hoard of Directors may from time to time determine. A meeting of the stockholders will be held at the office

QUR NEW DRLEAMS CORRESPONDENCE.

NEW ORLEANS, March 4, 1867.

This being the annual celebration for the parade of the New Orieans Fire Department, the streets of the city are througed with people. Perhaps no fire department grander display than the firemen of New Orleans. Their steam fire engines and hose carriages are of rare beauty and workmanship, and are decorated with flowers, banners, &c. Their horses are not the least interesting feamen these pets march along with arched necks, keeping the steady steps with a precision truly remarkable, moving or stopping simultaneously with the procession. They appear to know the difference between a parade and a funeral, for white in the former they are proud bearing and sprited, in the latter they march mournfully along in the rear of the hearse. Some of these noble animals are among the bandsomest in the country, and have done duty as "diremen" for ten, twelve and fifteen years.

The Stars and Stripes were well represented. On one cogine, however, might have been seen the motto, "tinted we stand, Divided we Falif," while the hubs of the wheels were decorated r.d. white and red—a curtous contradiction. The "Bouny Bine Flag" was played among the airs by the bands. Several companies from Mobile and other points assembled for the purpose of joining in the precession.

To-morrow we have a still greater day for sight seers, the Mardi Gras. "Ze Mistick Krewe of Komus" have prepared for one of the grandest torchight processions and balls ever witnessed in New Orleans. The city will be very merry to morrow with its ten thousand masked faces and fancy dresses, while the evening will pass as in fairy land in witnessing the procession of "Komus" Mistick Krewe," their strangs antice and grand ball. Those who have read a description of the carmival can form some idea of what to-morrow will be in New Orleans.

TRATING AT THE METARRE CORRES—EAST TIME.

The lastest time in harness on record over a Southern course was made to-day by Morrissey. The horses entered were Morrissey, W. K. Phomas and Farey Honshaw. The betting was two to one on the former against the field. There were three false starts before they finally got off. Morrissey passed the half-mile several lengths should be the same time and with the same result. The third heat Morrissey went around the track alone, Thomas being reported laine. Time 2:29, almost distancing the others. The second heat was accomplished in about the same time and with the same result. THE STARVING CRETANS.

From a letter written by the United States Consul at Canoa we extract the following facts in relation to the sufferings of the Cretan exiles:—From ten thousand to twenty thousand refugees are now in a state of the most abject poverty, their property having been either conflicated or they unable to return to their homes. The women and children, in particular, are suffering severely; the Turkish government refusing to allow them to return to Crete, or to leave the insergent lines unless their able bodied male relations accompany them. This, of course, cannot be, and the result is a continuance of barbartites on the part of the Hussulmans and greater calamity to the refugees. The Consul writes that contributions should be in food and clothes—in the latter case blue Merrimacs, drillings and dark cotton cloths being the best that can be sent.
